

Historic Preservation & Sustainability

Wednesday, May 19, 2010 | Hosted by RICSI

EVENT DESCRIPTION

Rehabilitating a historic building and designing a sustainable project are not always thought of as entirely compatible efforts. Obtaining approvals from historic review agencies while simultaneously earning LEED points offers its own set of challenges. This presentation will discuss how these design objectives can be integrated under one (hopefully green) roof to create a successful project that not only saves a historic structure, but that is respectful of the environment as well.

EVENT AGENDA Chelo's Banquet Hall | 2225 Post Road, Warwick, RI
| 5:30 PM Cocktails & Exhibits | 6:30 PM Dinner | 7:15 PM Presentation

Martha Werenfels, AIA is a Principal at Durkee, Brown, Viveiros & Werenfels Architects. Martha has extensive experience in a wide range of historic preservation projects, including restoration of national historic landmarks, rehabilitation of various building types, and compilation of preservation feasibility studies. She is also Past President of AIA and an advisor to the National Trust for Historic Preservation, serving on their Sustainability Task Force.
